

# SRX SERIES SERVICES GATEWAYS FOR THE BRANCH SRX100, SRX110, SRX210, SRX220, SRX240, SRX550, and SRX650

### **Product Overview**

SRX Series Services Gateways for the branch are security gateways that provide essential capabilities that connect, secure, and manage workforce locations sized from handfuls to hundreds of users. By consolidating fast, highly available switching, routing, security, and applications capabilities in a single device, enterprises can protect their resources as well as economically deliver new services, safe connectivity, and a satisfying end-user experience. All SRX Series Services Gateways, including products scaled for branch, campus, and data center applications, are powered by Junos OS—the proven operating system that provides unmatched consistency, better performance with services, and superior infrastructure protection at a lower total cost of ownership.

### **Product Description**

The Juniper Networks® SRX Series Services Gateways for the branch combine security and outstanding unified threat management (UTM) services with routing and switching in a single, high-performance, cost-effective network device.

- SRX Series for the branch runs Juniper Networks Junos® operating system, the proven OS that is used by core Internet routers in all of the top 100 service providers around the world. The rigorously tested carrier-class routing features of IPv4/IPv6, OSPF, BGP, and multicast have been proven in over 15 years of worldwide deployments.
- SRX Series for the branch provides perimeter security, content security, application visibility, tracking and policy enforcement, role-based access control, and network-wide threat visibility and control. Using zones and policies, network administrators can configure and deploy branch SRX Series gateways quickly and securely. The SRX Series also includes wizards for firewall, IPsec VPN, Network Address Translation (NAT), and initial setup to simplify configurations out of the box.
- Policy-based VPNs support more complex security architectures that require dynamic addressing and split tunneling. For content security, SRX Series for the branch offers a complete suite of Unified Threat Management (UTM) services consisting of: intrusion prevention system (IPS), application security (AppSecure), on-box and cloud-based antivirus, antispam, enhanced Web filtering, and data loss prevention to protect your network from the latest content-borne threats. Select SRX Series models feature Content Security Accelerator for high-performance IPS and antivirus scanning. The branch SRX Series integrates with other Juniper security products to deliver enterprise-wide unified access control (UAC) and adaptive threat management. These capabilities give security professionals powerful tools in the fight against cybercrime and data loss.
- SRX Series for the branch are secure routers that bring high performance and proven deployment capabilities to enterprises that need to build a worldwide network of thousands of sites. The wide variety of options allow configuration of performance, functionality, and price scaled to support from a handful to thousands of users. Ethernet, serial, T1/E1, DS3/E3, xDSL, Wi-Fi, and 3G/4G LTE wireless are all available options for WAN or Internet connectivity to securely link your sites. Multiple form factors allow you to make cost-effective choices for mission-critical deployments. Managing the network is easy using the proven Junos OS command-line interface (CLI), scripting capabilities, a simple-to-use Web-based GUI, Juniper Networks Network and Security Manager (NSM) for large scale deployments, or Juniper Networks Junos® Space Security Director for centralized management.

# **Architecture and Key Components**

Key Hardware Features of the Branch SRX Series Products

Product	Description
SRX100 Services Gateway	<ul> <li>Eight 10/100 Ethernet LAN ports and 1 USB port (support for 3G USB)</li> <li>Full UTM!; antivirus¹, antispam¹, enhanced Web filtering¹, intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control (UAC) and content filtering</li> <li>2 GB DRAM, 2 GB flash default</li> </ul>
SRX110 Services Gateway	<ul> <li>VDSL/ADSL2+ and Ethernet WAN interfaces</li> <li>Eight 10/100 Ethernet LAN ports and two USB port (support for 3G USB)</li> <li>Full UTM'; antivirus¹, antispam¹, enhanced Web filtering¹, intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control (UAC) and content filtering</li> <li>2 GB DRAM, 2 GB CF default</li> </ul>
SRX210 Services Gateway	<ul> <li>Two 10/100/1000 Ethernet and 6 10/100 Ethernet LAN ports, 1 Mini-PIM slot, and 2 USB ports (support for 3G USB)</li> <li>Factory option of 4 dynamic Power over Ethernet (PoE) ports 802.3af</li> <li>Support for T1/E1, serial, ADSL/2/2+, VDSL, G.SHDSL, and Ethernet small form-factor pluggable transceiver (SFP)</li> <li>Content Security Accelerator hardware for faster performance of IPS and ExpressAV (with high memory version)</li> <li>Full UTM'; antivirus¹, antispam¹, enhanced Web filtering¹, intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control (UAC) and content filtering</li> <li>2 GB DRAM, 2 GB flash default</li> </ul>
SRX220 Services Gateway	<ul> <li>Eight 10/100/1000 Ethernet LAN ports, 2 Mini-PIM slots</li> <li>Factory option of 8 PoE ports; PoE+ 802.3at, backwards compatible with 802.3af</li> <li>Support for T1/E1, serial, ADSL2/2+, VDSL, G.SHDSL, and Ethernet SFP</li> <li>Content Security Accelerator hardware for faster performance of IPS and ExpressAV</li> <li>Full UTM¹; antivirus¹, antispam¹, enhanced Web filtering¹, intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control and content filtering</li> <li>2 GB DRAM, 2 GB CF default</li> </ul>
SRX240 Services Gateway	<ul> <li>16 10/100/1000 Ethernet LAN ports, 4 Mini-PIM slots</li> <li>Factory option of 16 PoE ports; PoE+ 802.3at, backwards compatible with 802.3af</li> <li>Support for T1/E1, serial, ADSL2/2+, VDSL, G.SHDSL, and Ethernet SFP</li> <li>Content Security Accelerator hardware for faster performance of IPS and ExpressAV</li> <li>Full UTM¹; antivirus¹, antispam¹, enhanced Web filtering¹, intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control and content filtering</li> <li>2 GB DRAM, 2 GB compact flash default</li> </ul>
SRX550 Services Gateway	<ul> <li>Ten fixed Ethernet ports (6 10/100/1000 Copper, 4 SFP), 2 Mini-PIM slots, 6 GPIM slots or multiple GPIM and XPIM combinations</li> <li>Support for T1/E1, serial, ADSL2/2+, VDSL, G.SHDSL, DS3/E3, Gigabit Ethernet ports; supports up to 52 Ethernet ports including SFP; 40 switch ports with optional PoE including 802.3at, PoE+, backwards compatible with 802.3af (or 50 non-PoE 10/100/1000 Copper ports), 10GbE</li> <li>Content Security Accelerator hardware for faster performance of IPS and ExpressAV</li> <li>Full UTM'; antivirus¹, antispam¹, enhanced Web filtering¹, and intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control and content filtering</li> <li>2 GB DRAM default, 2 GB compact flash default</li> <li>Optional redundant AC power; standard AC power supply that is PoE-ready; PoE power up to 250 watts single power supply or 500 watts dual power supply</li> </ul>
SRX650 Services Gateway	<ul> <li>Four fixed ports 10/100/1000 Ethernet LAN ports, 8 GPIM slots or multiple GPIM and XPIM combinations</li> <li>Support for T1, E1, DS3/E3, Ethernet ports; supports up to 52 Ethernet ports including SFP; 48 switch ports with optional PoE including 802.3at, PoE+, backwards compatible with 802.3af (or 52 non-PoE 10/100/1000 Copper ports), 10GbE</li> <li>Content Security Accelerator hardware for faster performance of IPS and ExpressAV</li> <li>Full UTM¹; antivirus¹, antispam¹, enhanced Web filtering¹, and intrusion prevention system¹, AppSecure¹</li> <li>Unified Access Control and content filtering</li> <li>Modular Services and Routing Engine; future internal failover and hot-swap</li> <li>2 GB DRAM default, 2 GB compact flash default, external compact flash slot for additional storage</li> <li>Optional redundant AC power; standard AC power supply that is PoE-ready; PoE power up to 250 watts single power supply or 500 watts dual power supply</li> </ul>

### **Network Deployments**

The SRX Series Services Gateways for the branch are deployed at remote and branch locations in the network to provide all-in-one secure WAN connectivity, and connection to local PCs and servers via integrated Ethernet switching.

<sup>&</sup>lt;sup>1</sup> Unified Threat Management—antivirus, antispam, Web filtering, AppSecure, and IPS require a subscription license option to use the feature. UTM is not supported on the low memory version. Please see the ordering section for options. Content Filtering and UAC are part of the base software with no additional license.

### **Features and Benefits**

### Secure Routing

Should you use a router and a firewall to secure your network? By building the branch SRX Series with best-in-class routing, switching and firewall capabilities in one product, enterprises don't have to make that choice. Why forward traffic if it's not legitimate?

Figure 1: Firewalls, zones, and policies

SRX Series for the branch checks the traffic to see if it is legitimate and permitted, and only forwards it on when it is. This reduces the load on the network, allocates bandwidth for all other mission-critical applications, and secures the network from malicious users.

The main purpose of a secure router is to provide firewall protection and apply policies. The firewall (zone) functionality inspects traffic flows and state to ensure that originating and returning information in a session is expected and permitted for a particular zone. The security

policy determines if the session can originate in one zone and traverse to another zone. This architectural choice receives packets from a wide variety of clients and servers and keeps track of every session, of every application, and of every user. It allows the enterprise to make sure that only legitimate traffic is on its network and that traffic is flowing in the expected direction.

To ease the configuration of a firewall, SRX Series for the branch uses two features—"zones" and "policies." While these can be user-defined, the default shipping configuration contains, at a minimum, a "trust" and "untrust" zone. The trust zone is used for configuration and attaching the internal LAN to the branch SRX Series. The untrust zone is commonly used for the WAN or untrusted Internet interface. To simplify installation and make configuration easier, a default policy is in place that allows traffic originating from the trust zone to flow to the untrust zone. This policy blocks all traffic originating from the untrust zone to the

trust zone. A traditional router forwards all traffic without regard to a firewall (session awareness) or policy (origination and destination of a session).

By using the Web interface or CLI, enterprises can create a series of security policies that will control the traffic from within and in between zones by defining policies. At the broadest level, all types of traffic can be allowed from any source in security zones to any destination in all other zones without any scheduling restrictions. At the narrowest level, policies can be created that allow only one kind of traffic between a specified host in one zone and another specified host in another zone during a scheduled time period.

### **High Availability**

Junos Services Redundancy Protocol (JSRP) is a core feature of the SRX Series for the branch. JSRP enables a pair of SRX Series systems to be easily integrated into a high availability network architecture, with redundant physical connections between the systems and the adjacent network switches. With link redundancy, Juniper Networks can address many common causes of system failures, such as a physical port going bad or a cable getting disconnected, to ensure that a connection is available without having to fail over the entire system. This is consistent with a typical active/standby nature of routing resiliency protocols.

When SRX Series Services Gateways for the branch are configured as an active/active HA pair, traffic and configuration is mirrored automatically to provide active firewall and VPN session maintenance in case of a failure. The branch SRX Series synchronizes both configuration and runtime information. As a result, during failover, synchronization of the following information is shared: connection/session state and flow information, IPSec security associations, Network Address Translation (NAT) traffic, address book information, configuration changes, and more. In contrast to the typical router active/standby resiliency protocols such as Virtual Router Redundancy Protocol (VRRP), all dynamic flow and session information is lost and must be reestablished in the event of a failover. Some or all network sessions will have to restart depending on the convergence time of the links or nodes. By maintaining state, not only is the session preserved, but security is kept intact. In an unstable network, this active/active configuration also mitigates link flapping affecting session performance.

Figure 2: High availability

# Session-Based Forwarding Without the Performance Hit

In order to optimize the throughput and latency of the combined router and firewall, Junos OS implements session-based forwarding, an innovation that combines the session state information of a traditional firewall and the next-hop forwarding of a classic router into a single operation. With Junos OS, a session that is permitted by the forwarding policy is added to the forwarding table along with a pointer to the next-hop route. Established sessions have a single table lookup to verify that the session has been permitted and to find the next hop. This efficient algorithm improves throughput and lowers latency for session traffic when compared with a classic router that performs multiple table lookups to verify session information and then to find a next-hop route.

Figure 3 shows the session-based forwarding algorithm. When a new session is established, the session-based architecture within Junos OS verifies that the session is allowed by the forwarding policies. If

the session is allowed, Junos OS will look up the next-hop route in the routing table. It then inserts the session and the next-hop route into the session and forwarding table and forwards the packet. Subsequent packets for the established session require a single table lookup in the session and forwarding table, and are forwarded to the egress interface.

Figure 3: Session-based forwarding algorithm

### **Specifications**

### **Protocols**

· IPv4, IPv6, ISO Connectionless Network Service (CLNS)

### **Routing and Multicast**

- Static routes
- RIPv2 +v1
- · OSPF/OSPFv3
- BGP
- BGP Router Reflector<sup>2</sup>
- · IS-IS
- Multicast (Internet Group Management Protocol (IGMPv1/2/3), PIM-SM/DM/SSM, Session Description Protocol (SDP), Distance Vector Multicast Routing Protocol (DVMRP), source-specific, Multicast inside IPsec tunnel), MSDP
- MPLS (RSVP, LDP, Circuit Cross-connect (CCC), Translational Cross-connect (TCC), Layer 2 VPN (VPLS), Layer 3 VPN, VPLS, NGMVPN)

### **IP Address Management**

- Static
- DHCP, PPPoE client
- · Internal DHCP server, DHCP Relay

### **Address Translation**

- Source NAT with Port Address Translation (PAT)
- Static NAT
- Destination NAT with PAT
- · Persistent NAT, NAT64

### **Encapsulations**

- · Ethernet (MAC and VLAN tagged)
- · Point-to-Point Protocol (PPP) (synchronous)
  - Multilink Point-to-Point Protocol (MLPPP)
- · Frame Relay
  - Multilink Frame Relay (MLFR) (FRF.15, FRF.16), FRF.12, LFI
- · High-Level Data Link Control (HDLC)
- Serial (RS-232, RS-449, X.21, V.35, EIA-530)
- · 802.1g VLAN support
- Point-to-Point Protocol over Ethernet (PPPoE)

### L2 Switching

- · 802.1D, RSTP, MSTP, 802.3ad (LACP)
- · 802.1x, LLDP, 802.1ad (Q-in-Q), IGMP Snooping
- · Layer 2 switching with high availability

### Traffic Management Quality of Service (QoS)

- · 802.1p, DSCP, EXP
- · Marking, policing, and shaping
- · Class-based queuing with prioritization
- · Weighted random early detection (WRED)
- Queuing based on VLAN, data-link connection identifier (DLCI), interface, bundles, or multi-field (MF) filters
- · Guaranteed bandwidth
- · Maximum bandwidth
- · Ingress traffic policing
- · Priority-bandwidth utilization
- DiffServ marking
- Virtual channels

## Security

### **Firewall**

- · Firewall, zones, screens, policies
- · Stateful firewall, stateless filters
- Network attack detection
- Screens denial of service (DoS) and provides distributed denial of service (DDoS) protection (anomaly-based)
- Prevent replay attack; Anti-Replay
- · Unified Access Control
  - TCP reassembly for fragmented packet protection
  - Brute force attack mitigation
  - SYN cookie protection
  - Zone-based IP spoofing
  - Malformed packet protection

### UTM<sup>1</sup>

- · Intrusion Prevention System (IPS)
  - Protocol anomaly detection
  - Stateful protocol signatures
  - Intrusion prevention system (IPS) attack pattern obfuscation
  - User role-based policies

<sup>&</sup>lt;sup>1</sup> Unified Threat Management – antivirus, antispam, Web filtering, AppSecure, and IPS require individual subscription license. UTM is not supported on the low memory version. Please see the ordering section for options.

<sup>&</sup>lt;sup>2</sup> BGP Route Reflector supported on SRX550 and SRX650. See ordering section for more information.

### Specifications (continued)

### **UTM**<sup>1</sup> (continued)

- · Customer signatures creation
- · Daily and emergency updates
- AppSecure
  - AppTrack (application visibility and tracking)
  - AppFirewall (policy enforcement by application name)
  - Custom signatures
  - AppQoS (network traffic prioritization and bandwidth management)
  - Dynamic signature updates
  - User-based application policy enforcement
- Antivirus
  - Express AV (stream-based AV, not available on SRX100 and SRX110)
  - File-based antivirus
    - > Signature database
    - > Protocols scanned: POP3, HTTP, SMTP, IMAP, FTP
    - Antispyware
    - > Anti-adware
    - > Antikeylogger
  - Cloud-based antivirus
- Antispam
- · Integrated enhanced Web filtering
  - Category granularity (90+ categories)
  - Real time threat score
- · Redirect Web filtering
- Content Security Accelerator in SRX210 high memory, SRX220, SRX240, SRX550, and SRX650<sup>1</sup>
- ExpressAV option in SRX210 high memory, SRX220 high memory, SRX240, SRX550, and SRX6501
- Content filtering
  - Based on MIME type, file extension, and protocol commands

### **VPN**

- Auto VPN (Zero Touch Hub)
- · Tunnels (GRE, IP-IP, IPsec)
- IPsec, Data Encryption Standard (DES) (56-bit), triple Data Encryption Standard (3DES) (168-bit), Advanced Encryption Standard (AES) (128-bit+) encryption
- Message Digest 5 (MD5),SHA-1, SHA-128, SHA-256 authentication
- Junos Pulse Dynamic VPN client; browser-based remote access feature requiring a license
- IPv4 and IPv6 VPN
- · Multi-Proxy ID for site-to-site VPN

### Multimedia Transport

· Compressed Real-Time Transport Protocol (CRTP)

### **High Availability**

- VRRP
- JSRP
- · Stateful failover and dual box clustering
- · SRX550/SRX650:
  - Redundant power (optional)
  - GPIM hot swap
  - Future internal failover and SRE hot swap (OIR) on SRX650
- · Backup link via 3G/4G LTE wireless or other WAN

- Active/active—L3 mode<sup>2</sup>
- Active/passive—L3 mode<sup>2</sup>
- Configuration synchronization<sup>2</sup>
- Session synchronization for firewall and VPN<sup>2</sup>
- Session failover for routing change<sup>2</sup>
- Device failure detection<sup>2</sup>
- · Link failure detection<sup>2</sup>
- · IP Monitoring with route and interface failover

### IP<sub>v</sub>6

- · OSPFv3
- RIPng
- · IPv6 Multicast Listener Discovery (MLD)
- BGP
- ISIS

### Wireless

- CX111 Cellular 3G/4G/LTE Broadband Data Bridge supported on all branch SRX Series devices
- · 3G USB modem support for SRX100, SRX110, and SRX210

### SLA, Measurement, and Monitoring

- · Real-time performance monitoring (RPM)
- · Sessions, packets, and bandwidth usage
- · Juniper J-Flow monitoring and accounting services
- IP Monitoring

### Logging

- Syslog
- Traceroute
- Extensive control- and data-plane structured and unstructured syslog

### Administration

- Juniper Networks Network and Security Manager support (NSM)
- · Juniper Networks Junos Space Security Director support
- Juniper Networks STRM Series Security Threat Response Managers support
- · Juniper Networks Advanced Insight Solutions support
- External administrator database (RADIUS, LDAP, SecureID)
- · Auto-configuration
- · Configuration rollback
- Rescue configuration with button
- Commit confirm for changes
- · Auto-record for diagnostics
- · Software upgrades (USB upgrade option)
- · Juniper Networks J-Web
- · Command-line interface
- Smart image download

### Certifications

- · NEBS Compliance for SRX240, SRX6503
- Department of Defense (DoD) Certification for SRX Series Services Gateways, including testing and certification by the Department of Defense Joint Interoperability Test Command (JITC) for interoperability with DoD networks and addition of the SRX Series Services Gateways to the Unified Capabilities Approved Product List (UC APL)

<sup>&</sup>lt;sup>1</sup> Unified Threat Management – antivirus, antispam, Web filtering, AppSecure and IPS require individual subscription license. UTM is not supported on the low memory version. Please see the ordering section for options.

<sup>2</sup> SRX100B in talled with 1 GB DRAM, with 512 MB accessible. Optional upgrade to 1 GB DRAM is available with purchase of memory software license key.

<sup>&</sup>lt;sup>3</sup> Coming soon for SRX110 and SRX550.

# **Juniper Networks Services and Support**

Juniper Networks is the leader in performance-enabling services that are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to maximize operational efficiency while reducing costs and minimizing risk, achieving a faster time to value for your network. Juniper Networks ensures operational excellence by optimizing the network to maintain required levels of performance, reliability, and availability. For more details, please visit www.juniper.net/us/en/products-services.

<sup>\*</sup>There are several models available for the SRX210 and SRX240 including the enhanced version. Please contact your Juniper or partner account representative for more information.

<sup>&</sup>lt;sup>1</sup> SRX210H-POE is class A.

Model Number	Description	Model Number	Description
SRX550 Base S	<u>'</u>	SRX-BGP-ADV-LTU	Advanced BGP License for SRX550 and
SRX550- 645AP	SRX550 Services Gateway, 2 RU height, 6 GPIM slots. 2 Mini-PIM slots. 6 10/100/1000BASE-T	SRX550-K-AV-5	SRX650 only  Five year subscription for Juniper-Kaspersky AV
	ports, 4 GbE SFP ports, dual PS slots, fans; ships with one 645 watt AC power supply with 247 W PoE power (power cord and rack-mount	SRX550-S-AV-5	updates on SRX550  Five year subscription for Juniper-Sophos AV
	kit included)	CDVEEO IDD E	updates on SRX550
SRX550- 645DP	SRX550 Services Gateway, 2 RU height, 6 GPIM slots, 2 Mini-PIM slots, 6 10/100/1000BASE-T	SRX550-IDP-5 SRX550-W-WF-5	Five year license for IDP updates for SRX550  Five year subscription for Juniper-Websense
	ports, 4 GbE SFP ports, dual PS slots, fans; ships with one 645 watt DC power supply with	2- IVV-00-VV-VVI	Web filtering updates on SRX550
	247 W PoE power (no power cord and rack- mount kit Included)	SRX550-SMB4-CS-5	Five year security subscription for enterprise— includes Kaspersky AV, enhanced WF, Sophos AS, AppSecure and IDP on SRX550
	Supplies and Accessories	SRX550-S-SMB4-	Five year security subscription for enterprise—
SRX600-PWR- 645AC-POE	Spare 645 W AC PoE power supply unit for SRX550 and SRX650 systems—one is included in SRX550 and SRX650 base systems	CS-5	includes Sophos AV, enhanced WF, Sophos AS, AppSecure and IDP on SRX550
	(SRX650-BASE-SRE6-645AP, SRX550-645AC)	SRX-RAC-5-LTU	Dynamic VPN Client: 5 simultaneous users for SRX100, SRX110, SRX210, SRX220, SRX240, SRX550, and SRX650
SRX600-PWR- 645DC-POE	645 W DC source power supply for SRX550, SRX650 provides 397 W system power @ 12 V and 248 W PoE power @ 50 VDC; works with 43-56 VDC input—no power cord	SRX-RAC-10-LTU	Dynamic VPN Client: 10 simultaneous users for SRX100, SRX110, SRX210, SRX220, SRX240, SRX550, and SRX650
SRX550-CHAS	SRX550 Services Gateway, 2 RU height, 6 GPIM slots, 2 Mini-PIM slots, 6 10/100/1000BASE-T ports, 4 GbE SFP ports, dual PS slots, fans	SRX-RAC-25-LTU	Dynamic VPN Client: 25 simultaneous users for SRX100, SRX110, SRX210, SRX220, SRX240, SRX550, and SRX650
SRX550-FILT-01	(power supply not included)  Not included in SRX550 systems, optional, as this is not required for normal operations, but	SRX-RAC-50-LTU	Dynamic VPN Client: 50 simultaneous users for SRX210, SRX220, SRX240, SRX550, and SRX650 only
SRX550 Addition	recommended for dusty environments  onal Software Feature Licenses	SRX-RAC-100-LTU	Dynamic VPN Client: 100 simultaneous users for SRX220, SRX240, SRX550, and SRX650 only
SRX550-K-AV	One year subscription for Juniper-Kaspersky antivirus updates on SRX550	SRX-RAC-150-LTU	Dynamic VPN Client: 150 simultaneous users for SRX220, SRX240, SRX550, and SRX650 only
SRX550-S-AV	One year subscription for Juniper-Sophos antivirus updates on SRX550	SRX-RAC-250-LTU	Dynamic VPN Client: 250 simultaneous users for SRX240, SRX550, and SRX650 only
SRX550-IDP	One year subscription for IDP updates on SRX550	SRX-RAC-500-LTU	Dynamic VPN Client: 500 simultaneous users
SRX550-S2-AS	One year subscription for Juniper-Sophos antispam updates on SRX550	SRX550-APPSEC-A-1	for SRX550 and SRX650 only  One year subscription for Application Security
SRX550-W-WF	One year subscription for Juniper-Websense Web filtering updates on SRX550	SRX550-APPSEC-A-3	and IPS updates for SRX550  Three year subscription for Application Security
SRX550-SMB4-CS	One year security subscription for enterprise—		and IPS updates for SRX550
	includes Kaspersky AV, enhanced WF, Sophos AS, AppSecure and IDP on SRX550	SRX550-APPSEC-A-5	Five year subscription for Application Security and IPS updates for SRX550
SRX550-S-SMB4-CS	One year security subscription for enterprise—includes Sophos AV, enhanced WF, Sophos AS, AppSecure and IDP on SRX550	SRX240 Base S	ystem SRX240 Services Gateway with 16 x GbE
